

Alexander Berman

PhD Candidate

Computer Scientist
anberman@tamu.edu

Overview: HCI Researcher with experience in digital fabrication, machine learning, and robotics seeking employment after graduation

Experience

Department of Defense

Summers 2017 and 2018

Analyzed associations between images and text in unstructured multimedia datasets (Darknet Markets and Wikipedia) by training (via transfer-learning) Convolutional Neural Networks to predict semantic embedding of source text associated with a given image. Helped develop visualizations for exploring these relations.

Research with Dr. Francis Quek

2015 to Present

Studying educational methods and tools used by people employing personal fabrication methods. Have done work investigating how students learn with Making-oriented classroom activities. Dissertation plan is on investigating how individuals derive 3D designs based on prior works, and how that can better support 3D printing education.

Research with Dr. Emily Mower-Provost

2013 to 2015

Trained SVM Classifiers to determine speaker's Emotion in real-time with audio-video (webcam) data of speaker. Created real-time website to demonstrate Emotion Classification.

Coded Machine Learning Library and Tools for Intelligent Interactive Systems course.

John Deere - Moline, IL Headquarters

Summer 2014

Created low-cost distributed prototype Surveillance System on 6150R Tractor and other Farm Equipment by Integrating new Sensors and Processors into vehicle CAN buses.

Setup a server and simple phone application for farm supervisor to monitor fleet and receive security notifications.

Math Tutoring Center at Northwestern Michigan College Summer 2012

Education

Texas A&M - Computer Science PhD Student

2015-Present

All non-elective courses completed in addition to electives relating to HCI and Machine Learning.

Research with Dr. Francis Quek in TELab relating to Embodiment Interaction, Social Media, and Maker Movement

University of Michigan - Computer Science BSE

2011-2015

Courses related to HCI, AI, and Robotics while researching with Dr. Emily Mower-Provost on Emotion Recognition

Activities

UM::Autonomy

2011-2015

Electrical Team Leader (2013-2014): Assemble & Maintain onboard computer with sensors, work with embedded systems, and write Perception Software. Lead, Teach, and Supervise Multidisciplinary Team.

Design and code small fully-autonomous boat to navigate buoy course and perform various tasks.

2012 International AUVSI RoboBoat Competition Champions

IEEE-ACM

2012-2015

Department Relations Officer (2013-2014): organize events with Faculty in the Electrical Engineering and Computer Science department to improve collaboration between students and faculty. (Biweekly Meetings and Events)

Michigan Marching and Hockey Bands

2011-2015

Perform Tuba at all home and some away football and hockey games (~2 Hours a Day plus Games)

2014 Parkinson Michigan Marching Band Scholarship recipient

Boy Scouts of America Eagle Scout and Senior Patrol Leader 2011

Skills

Programming: Python, C/C++, Java, Matlab, Perl, Bash, BASIC, JavaScript, CSS, HTML, Ruby on Rails, SQL

Fabrication: Simple Circuit Design and Assembly, Microprocessor Utilization, 3D Printing, Power Tools

Software: Jupyter Notebook, Linux, XCode, Eclipse, Photoshop, Qt, CAD (Fusion 360), Cura
